

Ernest Healthcare, Inc. - Rehabilitation Hospitals

Dekker/Perich/Sabatini is currently working on a variety of projects for Ernest Healthcare, Inc., a growing healthcare services company. Each of the facilities is freestanding, 40-bed physical rehabilitation or long term acute care hospitals. Approximately 50,000sf in size, these hospitals are located primarily in underserved areas and provide care for patients recovering from stroke, heart attack, brain injury, spinal cord injury, orthopedic conditions, cancer, and pulmonary conditions. These facilities offer physical therapy, speech therapy, and psychiatric services that bridge an important gap in transitioning patients from acute care facilities back to home living. With a 12-day average stay, these hospitals strive to maintain a friendly environment that promotes healing of the body, mind and spirit.

Locations: Various

Size: Approximately 50,000sf per facility
